

Firmware Technologies Inc. white label's vistime, the world's most powerful collaboration and multi file viewing platform, for Viewocity USA

July 2010

This partnership signals the arrival of vistime in the world market as the most powerful and easiest to use collaboration product available. Viewocity have taken advantage of vistime's unique collaboration technology and powerful multi-file viewer platform to create a dynamic new product branded as Viewocity Meetings. With vistime's worldwide patented technology, Viewocity clients now have both state of the art phone conferencing and web conferencing at call.

Vistime is the world's most comprehensive real time shared media, visual communication and work flow environment, incorporating the world's most powerful extensible interpreter platform that supports drag and drop of hundreds of file types into it's viewing playlist, all without the need for the originating software.

With vistime powering Viewocity Meetings we can continue our leading edge technology advances to recreate the impact and interactivity of real-world conferences without having to leave your desk. Competing in today's global economy where the flow of information is paramount to achieving success requires strong dedicated partners. By Constantly expanding the limits of communication, we insure that our customers are always one step ahead of the competition."

- Robert McAllister - President & CEO Viewocity. Head Office, Salina Beach. San Diego, USA

" High fuel prices, rising air travel and the economic slowdown will drive worldwide sales for vistime, as companies seek to work more efficiently," says Firmware Technologies Inc. President Jacques Blandin.

Viewocity Conferencing, will acquire considerable vistime conference and collaboration time on a major global basis.

Vistime™ sets out to:

1. Collaborate
2. View
3. Modify / annotate / mark-up multi files
4. Instantly share documents, images (2d, 3d), videos, CAD/CAM3 and more, in a fully encrypted SSL secured conference environment.

ABOUT VISTIME.COM

Firmware Technologies Inc. is a Delaware registered Corporation having its head office based in Western Australia. Firmware is breaking through the world collaboration; virtual display and imaging markets with leading edge technology that will change the way people connect, communicate and collaborate.

Vistime™ develops virtual display and imaging solutions that make the viewing, editing and sharing of multiple documents, images and other file types easier, faster and more efficient. Vistime™ is a software product that allows a licensed user to invite colleagues, clients or any number of nominated participants into a secure session during which, participants are able to simultaneously view and interact with any supported document, image, video or 3D image through a simple and common interface.

Vistime™ breaks through the world's communication barriers by offering extraordinary real time interaction at an amazing 1,000th of the data requirements of conventional desktop sharing technologies.

Vistime™ is an innovation with application solutions for Media, Advertising, Mining, Oil & Gas, Engineering & Architecture, Medical & Health and many other industries. The innovation involves using mathematical data and proprietary communication principles rather than general desktop sharing or standard file transfer principles.

ABOUT Viewocity

As an industry leader in high-quality, collaborative electronic meetings, Monster Conferencing have established Viewocity, offering the most effective and efficient audio conferencing service in the market today. And while we offer a complete range of services, we pride ourselves on fully understanding our clients' needs and customizing conferencing solutions for them.
